

# SHUTTLE (AM) system

## SHUTTLE (AM)

An unique mini track connecting system designed to perform multiple tasks in professional shelf display.

Allowing mini spot, linear, undercabinet fixtures to be freely and easily combined in any location to get your ideal light distribute effect.

Plug and play for easy installation and maintenance, a great method to save labor cost.

Slim and light weight design fixtures showing elegant temperament.

## SHUTTLE Track mounting

Smooth surface like glass, marble, etc., can be secured by adhesive tape

Rough surface like wood, aluminum, steel etc., can be secured by screws

Steel (Magent)

Steel (Magent)

SHUTTLE Track mounting

Cut ALU profile & track

Track (Adhesive tape)

Apply adhesive tape on the back of the track, then stick onto the smooth surface.

Track (Mounting clip)

Distance between clips is 200mm, secure the clips with screw then click the track on the clips.

Aluminum profile (screw)

Pre-drill 7mm holes on the aluminum profile, secure the profile with screws on the surface, the height of the screw head shall not exceed 2mm.

Secure the profile with screw, the height of the screw head shall not exceed 2mm.

Aluminum profile (magnet)

Apply the magnet profile on steel surface.

## SHUTTLE (AM)

Suitable for display shelves, and / or with movable laminates, or small area lighting. Tracks can be installed inside the extruded profile, making installation easy. Power feed can be added for other 24VDC fixtures not installed on the track. Making SHUTTLE a connecting system.

# SHUTTLE (AM)

Below is a exploded illustration, tracks can be linked via connection cord,  
Power feed can also be used for fixtures installed away from the track.  
To build up the lighting environment needed.

# SHUTTLE (AM) assemble system

Max wattage connection is suggested to be 80% of the driver's max. output wattage  
 When the max. wattage exceeds the driver's output wattage, new driver and track is needed.

ETL Standard  
 Only connect to adjacent units ,96W maximum.  
 Conform to UL STD. 2108 , Certified to CSA STD. C22.2 NO. 9.0.  
 Use only with CLASS 2 power unit.

SHUTTLE-L can also be used between tracks to continue the circuit.

When maximum wattage has been reached, a sidefeed, new track and driver is needed to supply more power for continuous connection. SHUTTLE-L sidefeed can be used on one end of the new track for continuous linear light.

Continuous linear illustration.

# SHUTTLE (AM)

SHUTTLE fixtures can be clipped onto the track, tools-free, easy installation & maintenance.

**SHUTTLE-L**  
Seamless design to make continuous lighting.  
Plug and play feature to repositioning the fixtures anywhere along the track.

**SHUTTLE-L-S**  
Seamless design with square diffuser

SHUTTLE-B  
Round module with dots-free effect

SHUTTLE-S  
Available in 1W and 2.2W, changing beam angle by adjusting the lever.

SHUTTLE-S-F  
2.2W spot light with higher output.

SHUTTLE-N  
Bendable tube provides more precision spot location. changing beam angle by adjusting the lever.
